Hi Holly,

To address this in the quickest way, I suggest that you contact EPA's Records Center in SF directly (chan.elaine@epa.gov) and request a site index. That is an xl spreadsheet that has a list of all of the documents in the file. You can tell them that you work with me and that you are the consultant for an RP.

Some of the documents you listed below are likely in the file. Please make a note of the document control # assigned to each of these files and send that information back to me.

For the subset of documents you list below that are not in the file, please send them to me electronically and I will file them. The Records Center will then assign each document a control #.

Once I have all of the control #s, I can make a request to EPA's webmaster to upload all of them to the website.
